

‘Within the Byrne Group of companies we were looking to move all five of our websites onto a modern content management system in the most efficient and pain-free way. This project would enable us to manage our web content within a non-technical environment whilst maintaining visual impact and professionalism.

After a thorough investigation of the CMS market and significant time invested in usability of CMS systems, it was decided to use Chris Curd Design.

Having chosen Chris Curd Design for this project we have been extremely pleased with the way in which the project was delivered in a thoroughly professional manner, ahead of schedule and to a flawless standard.

The CMS itself is extremely easy to use yet powerful enough to meet our exacting requirements comfortably.

Our websites lead the way in our industry with a modern look, tactile feel and most importantly up to date content.

We are increasingly pleased with the quality and innovation of design, we look forward to continuing our successful relationship with Chris and his team.’

Matthew Preston, Director, Byrne Group PLC
